

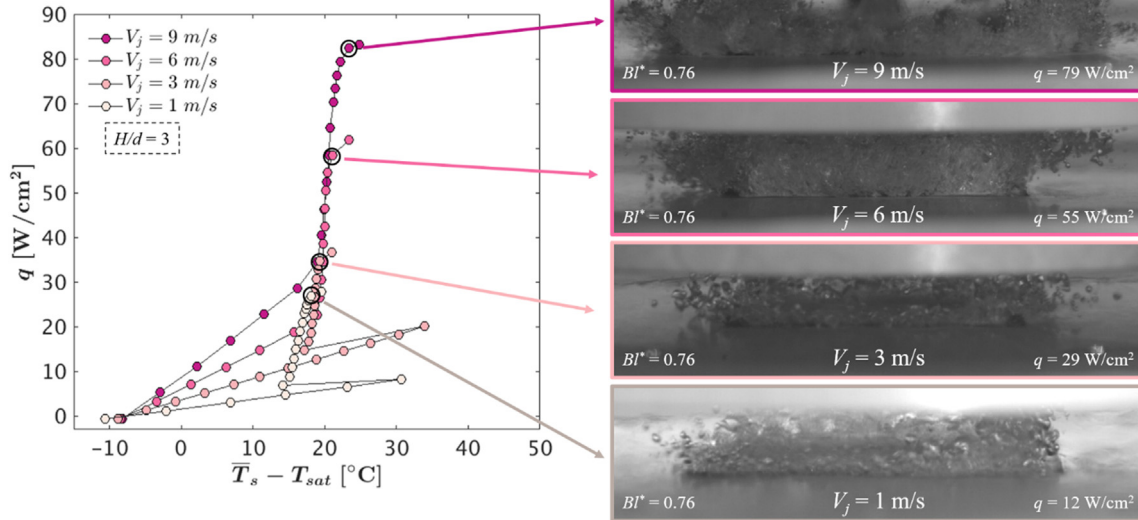

Fig. 5. Comparison of high-speed video frames across four jet velocities ($V_j = 1$ m/s, 3 m/s, 6 m/s, and 9 m/s; $H/d = 3$) at a constant non-dimensional heat input ($Bl^* = 0.76$). The corresponding heat fluxes for each jet velocity are highlighted on the boiling curve. Full videos are included in the [Supplementary Materials](#).
